

**IN THE CLAIMS:**

Please amend the claims as follows:

Sub B1  
1. (Amended) A method of providing information to a user comprising:  
collecting information at a first computer system;  
organizing said information into a plurality of first web-sites, each of said first web-sites  
being addressable by a unique Universal Resource Locator (URL) and having a physical location  
associated therewith;  
[providing] assigning one of said first web-sites to a user as a user web-site; and  
selecting links to a plurality of said first web-sites for presentation on said user web-site  
based on a relationship between the physical locations associated with said first web-sites and the  
physical location associated with said user web-site.

Sub B2  
16. (Amended) A method of providing information to a user comprising:  
collecting information at a first computer system;  
organizing said information into a plurality of first web-sites, each of said first web-sites  
being addressable by a unique Universal Resource Locator (URL) and having a physical location  
associated therewith;  
[providing] assigning one of said first web-sites to a user as a user web-site;  
selecting links to a plurality of said first web-sites for presentation on said user web-site  
based on a relationship between the physical locations associated with said first web-sites and the  
physical location associated with said user web-site; and  
accessing said user web-site by a second user.
